PROFESSIONAL SUMMARY

Full-Stack Blockchain Engineer with 3+ years of experience building scalable Web3 and full-stack applications using Solidity, Ethereum, Next.js, React.js, Django, Node.js, and Rust. Experienced in smart contracts, wallet integrations, backend APIs, ERC-20 token development, and decentralized application architecture across Ethereum and Solana ecosystems.

Skills

- Blockchain & Smart Contracts: Solidity, Rust, Hardhat, Anchor, ERC-20, ERC-721, Ethereum, Solana, Web3.js, Ethers.js, Metaplex
- Frontend: React.js, Next.js, Angular, Flutter, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
- Backend: Node.js, Django, Express.js, REST APIs, PostgreSQL, MongoDB, MySQL
- Tools & Platforms: Git, GitHub, Jira, Postman, Figma, VS Code, Agile Development

Experience

Full-stack & Blockchain Developer	<u>The-Ally</u>	Bangalore, India (Remote)	05/2025 – Present
• Developing a full-stack Ethereum-based dApp using Solidity, Hardhat, Next.js, Django and Node.js. • Designing and deploying ERC-20 smart contracts with secure blockchain transaction workflows. • Working on a CBDC token platform with smart contract-based token management and secure financial workflows. • Optimizing smart contract interactions for scalability, gas efficiency, and security best practices. • Developing production-grade full-stack applications using Next.js, Django and MySQL. • Designing and integrating REST APIs for frontend-backend communication and third-party service integrations. • Managing backend infrastructure, database operations, and application performance optimization. • Building scalable backend APIs and managing database architecture using Django and MySQL.			
Full-stack & Blockchain Developer	<u>Skytrade</u>	USA (Remote)	09/2024 – 05/2025
• Built Solana dApps using Rust, Anchor and Next.js with secure smart contract integrations. • Implemented multi-wallet support including Phantom, Solflare and Backpack wallets. • Developed a drone signal verifier on Peaq Network using Flutter, Node.js and Next.js. • Worked with NFT minting, compute units, rent exemptions, and priority fees.			
Software Engineer (Freelancer)	<u>DL SSR Infotech</u>	Delhi, India (Remote)	04/2024 – 09/2024
• Developed responsive web and mobile applications using Flutter, Next.js and React.js. • Optimized performance, resolved bugs, and collaborated with UI/UX teams using Figma.			
ML - AI intern	<u>Edunet foundation</u>	Ahmedabad, India	01/2024 – 03/2024
• Developed and trained deep learning models for image recognition tasks. • Built deepfake image detection models using Python and TensorFlow. • Improved model accuracy through dataset analysis and feature engineering.			
Front-end Developer (Angular)	<u>Ximple Solutions</u>	Ahmedabad, India	06/2022 - 01/2023
• Developed ERP web interfaces using Angular, TypeScript, HTML and CSS with focus on performance optimization.			

Projects

- **Drone Signal Verifier** – Built a cross-platform application to verify drone signals using Peaq Network and Solana. Developed the frontend with Flutter (mobile) and Next.js (web), and automated backend logic for wallet integration and smart contract execution.
- **Multi-Wallet Solana dApp** – Created a decentralized application supporting multiple Solana wallets (Phantom, Solflare, Backpack). Developed using React and Next.js, with smart contract interactions optimized for rent exemption, compute units, and priority fees.
- **Deepfake Image Detection** – Developed a machine learning model using Python and TensorFlow to detect deepfake images. Processed large image datasets with MongoDB, achieving high accuracy. Authored a research paper explaining the model's architecture, training, and real-world applications.
- **Follow the Path Game** – Designed a 2D game using Unity and C# where the player navigates levels by following pathfinding indicators. Demonstrated skills in game logic, animation, and UI design.

Education

- **B.Tech (CSE) – Silver Oak University | CGPA: 9.7 | 2020 – 2024**
- **Senior Secondary – Bright High School, GSEB | 2019 – 2020**

Certification

- **Encode x Solana Rust Bootcamp Q4 2024**
- **Google Data Analytics – Coursera**
- **JavaScript – Udemy**
- **Google Cloud Career Readiness – Google**
- **IBM Cloud Computing – IBM**
